

The world's technology gets smarter by the day and at **Mukandu** we strictly aim in making buildings smarter, greener, off the grid, independent and self sustainable.

ECO-SMART

1. Internet of Things Home Products

Mozaik Operations is an international joint venture between ABB, Bosch, and Cisco. They develop and operate an open software platform for the connected smart home.

2. Sengled Smart Bulb

With the setting controls for the Sengled Smart Bulb, it's simple to monitor lights remotely, schedule them to come on before you get home from work in the evenings or even create a realistic use pattern when you are out of town to make your home appear occupied.

6. Smart recycling bin

Recycling is hard. You have to put the paper here and the plastic there. Today you need a connected Smart Bin like the Eugene. Eugene scans the bar code on the the package you are throwing away and tells you what to do.

5. Smart Flower Solar.

Smartflower's modular solar panels autonomously follow the sun so they're always at the optimal angle to the sun, generating 40% more energy production than traditional solar.

4. Smart Irrigation

Rain Bird ST8-WiFi puts control over your sprinkler system in the palm of your hand. Whether you're outside in the garden or away from home, you're always connected to your landscape.

3. Smart Plugs/Outlets

The GE Z-Wave In-Wall Smart Outlet enables wireless control of on/off functions of plug outlets enabling you to control lamps and other electrical appliances wirelessly.
